

- Critical Path

- The path that would get all stories done in the least amount of time was to finish [009] first and then [010] + [016] can be done simultaneously as they are independent of each other
- To make sure our sprint stayed on schedule we did the following:
 - Set a hard deadline for [009] to be completed so that we had adequate time to complete [010] and [016]
 - Sunday March 12 was the deadline
 - Group members that were not working on [009] would ask for a progress report of the story every day leading up to the hard deadline. This ensured that the members assigned with [009] were not procrastinating
 - If any member in [009] came across difficulties in achieving the deadline, another member would assist them in completing their tasks
