Average Daily Burndown
19.62 Points

Estimated Completion Date
Mar 03, 2023

- Our planned velocity for the **previous sprint (1)** was 36 points but we only completed 21 of those points
- Our planned velocity for **this sprint (2)** was 35 points
 - We were able to achieve this
- Velocity change
 - In sprint 1, we had two group members that initially were planning to do their user stories the last few days before the deadline. However, they both ended up dropping without having done any work which is why we had a lower team velocity.
